

## Summer School Information 2025

### Purpose:

Summer School is an academic intervention that allows students to grow their understanding of subject specific course material. Summer School is designed for three groups of students:

- 1.) Students who were not successful during the school year and must repeat a course the following school year. Students spend the equivalent of 6 weeks of class time during the month of July. This gives students who struggled the time to better understand the course material and be ready for the next grade level.
- 2.) Students who passed a course but want to upgrade their current mark. Post-Secondary institutions often have minimum grade averages, or a minimum mark may be required on a specific course. Often students will repeat a course that they have already passed in the hopes of getting a higher mark. **The summer school mark appears on a student's transcript and is used to determine admission and any potential scholarships.**
- 3.) Students who are entering high school in the Fall of 2025 and need to enhance their academic and work habit skills to be ready for high school.

### Registration Requirements:

Registration is done on the ASD-E website:
